

WHISTLE WITH A BLADE OF GRASS

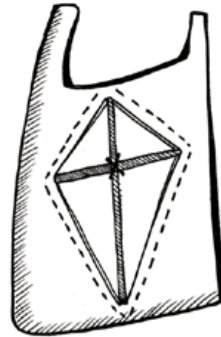

Find a thick(ish) blade of grass and make it tight between your 2 thumbs. Blow between the gap in your thumbs.

Can you make it whistle?
Does the thickness of the grass make a difference to the sound?

BUILD A KITE FROM A PLASTIC BAG

YOU NEED: • scissors • string • a plastic bag • tape • 2 wooden dowels (thin, light sticks)

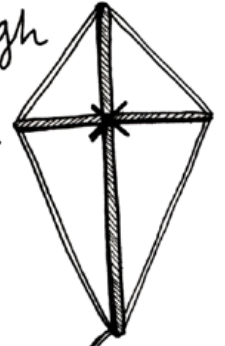

④ Cut the bag slightly bigger than the kite frame.

① cut notches in the ends of the dowels

② Using string tie the 2 dowels together (make an 'x')

③ Thread the string through the notches to the make a diamond

⑤ Fold the edges of the plastic bag over the frame... → STICK 'EM DOWN! with tape

⑥ MAKE A TAIL from strips of plastic bags & tie them to the kite frame

⑦ Tie a string from top to bottom & attach a flying string 1/3 of the way down.

HAVE FUN & GO FLY!

DO AN EXPERIMENT...
Is it true or just an old wives' tale that spiders are afraid of conkers?

FISHPONDS BROOK

With YOUR SHOES

PLAY BOULES

WITH CONKERS

If you don't have a set of boules set then you can always improvise with conkers, your shoes or ANYTHING. Set a target around 4 metres away. Try to land your throw close to it, touching if possible. The throw that is the furthest away from the target is given 1 point, the second furthest 2 points, the third furthest 3 points etc. The person with the most points wins!
