

BEGBROOK GREEN

Test your communication skills and creativity with this basic game:

With your partner(s), each collect a bunch of different found objects like sticks, stones, leaves, daisies etc. You all need to have the same collection of objects.

With your backs to each other, one person makes a shape from the found objects - it can be a pictorial or abstract... make anything you like from them. Then, describe the shape you made to your partner - the aim is that they try to make the exact same shape from their set of found objects. Or they can draw the shape that you describe.

MAKE LEAF

N I M A L S

Collect leaves - can you make animals from them? Take your creations home to stick to paper or simply leave them to be found as pieces of art!

Test your ↓ CREATIVITY

Walk around and pick a random object that you can see - like a bench, a leaf, a shoe...it can be ANYTHING!

Then make a list of all of the alternative uses that the object could be... could a leaf be a blanket for a mouse? Or a surfboard for a bird? Or an organic earring? You could take turns with a friend - who can think of the most original, silly, realistic or outrageous uses for the object?
